## Career Aspiration

---

Seeking an opportunity to advance my passion in software engineering, electrical engineering, and 3D graphic design. Enjoy learning and developing new skills, interacting in teams as well as independent problem solving.

## Experience

---

*Web Designer and Developer Intern*  
UHelpFoundation

June 2017 - August 2017

- Consulted with client to outline website goals, illustrate wire frame, and site functionality
- Created various web ready graphics and resources
- Educated client on how to use software to continuously maintain website

*Technical Analyst Investments*  
*Technical Analyst Member Services*  
Ontario Teachers' Pension Plan

April 2016 - August 2016

April 2015 - August 2015

- Independently designed, programmed, and implemented an automated scheduler application to help streamline processes and increase workplace efficiency within the corporation
- Actively participated in team scrum sessions, assisted and initiated various projects
- Utilized exceptional multitasking and time management skills working in a fast paced multiple tier IT environment
- Provided front line technical support for various devices to traders, executives, and corporate staff
- Monitored, tracked, and addressed corporate clients' technical service requests and problems

*Finance Assistant*  
Onex Corporation

June 2014 - August 2014

- Assisted in the detailed preparation of various tax reports
- Provided administrative and technical support to various finance staff
- Used efficient time management to complete tasks ahead of assigned timelines

## Education

---

Bachelors of Science Honours Computer Science  
Minor, Economics (Expected August 2018)  
Wilfrid Laurier University

April 2018

## Skills and Interests

### Technical Skills

#### Extensive experience in:

Java, Python, C#, C++, SQL, Swift, JavaScript, CSS, VB, PHP, HTML

#### Tools and Software:

Eclipse, XCode, Virtualbox/VMware, Git, Adobe Photoshop & Illustrator, MS Office, CAD software

### Interests

#### Knowledge of circuit design

Hand-wired an electric skateboard, constructed and programmed a mechanical keyboard, built a 3D printer

#### Passionate software and hardware developer

Obtained 1<sup>st</sup> place at Hack the Night Away Waterloo for the project 'Robocop' a license plate recognition software
